

Duct Wrap Roll & Sonic Liners

Date: 19/01/2021

Reference: 21

Issue: 1

Guardian duct wrap roll and liners are designed to give acoustic and thermal protection to ductwork and large vessels with a class O fire performance.

FACING OPTIONS

Guardian duct wrap and liners are available with the following facings to one or both sides:

- 1) Cladface external/clean hygienic facing white, black or grey
- 2) Class O standard silver foil
- 3) Class O black lacquered foil
- 4) Class O white lacquered foil
- 5) Black glass tissue
- 6) White glass tissue
- 7) Black class O rated acoustic tissue
- 8) Black woven glass cloth
- 9) White woven glass cloth
- 10) A range of coated and high temperature cloths

ACCESSORIES

Silver class O foil in 45m long rolls 50mm, 75mm and 100mm wide

- 1) Black class O foil in 50m long rolls 50mm, 75mm and 100mm wide
- 2) White class O foil in 50m long rolls 50mm, 75mm and 100mm wide
- 3) Black cladface tape 50m x 70mm wide
- 4) White cladface tape 50m x 70mm wide

Note: Black and white class O tapes are the only compatible tapes for the black and white lacquered foils that are guaranteed to stick. Only 100mm wide for joints must be used. Cladface tape is made from the same materials and has a fully external/water resistant adhesive applied.

TECHNICAL DATA

Guardian duct wrap rolls and liners are manufactured from a core of glass fibre which has a fire classification of A1 EUROCLASS in accordance with BS EN 13501. All facing materials as stated are tested to BS476 and BS EN 1350 where applicable. On all joints 100mm tapes to be used

Rock mineral is available on request
