

GUARDIAN JACKETS & COVERS

Guardian 4 Solutions offers a cost effective removable and reusable range of jackets and covers for thermal, acoustic or fire applications tailor made to your requirements.

APPLICATION

To insulate pipework, flanges, valves, machinery

MATERIALS

The core materials are glass wool, rock mineral wool, high temperature ceramic wools, body soluble wool, polymeric barriers for acoustics as well as others.

Jacket and cover facings include ceramic cloth, glass cloths (coated or plain), plastic or foils to suit applications from -38°C to +1260°C.

These are finished with eyelets, Velcro or nylon cable closure options.

BENEFITS

- 1) Reduces ongoing bills with rapid capital recovery
- 2) Personal protection from burns.
- 3) Easy to install and remove.
- 4) No need for specialist contractors for installation.
- 5) Low purchase costs.
